

Our mission is to offer our customers the highest in customer service and top quality engineered parts for their modified automobile. Delivering suspension tuning and give the ability to affordable pricing on their performance upgrades. We specialize in suspension performance parts and have the ability to improve your street machine for daily driving or on race day. We keep an open mind to all makes and models of car performance and welcome the challenge to improve your ride.

We specialize in performance engineered components for the automotive aftermarket world. We offer suspension and chassis components for street to competition series automobiles. We have new items in the R&D stage and will continue to increase our performance products catalog. Our combined talents of race car building and knowledge in street tuned suspension technology, we can offer our customers the best of both world when developing their next build.
